WriteWell Launches Revolutionary Writing Instrument

CHICAGO—WriteWell Instruments, Inc., today announced the launch of a brand new, revolutionary writing instrument, the Wonder Pen. This outstanding product is about to change the face of writing tools with its never before seen advancements and environmental impact.

With the use of the principles of laser technology, the WriteWell team created an inkless pen which they named the Wonder Pen. This ground breaking pen is not only compatible with any surface type, but it also helps reduce the carbon footprint on this planet.

The ink inside of ordinary pens can lead to soil and water pollution, which makes the Wonder Pen a great alternative. President and CEO of WriteWell, Russel A. Sharp, said “the Wonder Pen is a small way to give back to the environment.”

According to President and CEO, Russel A. Sharp said, “The Wonder Pen is a life changing gadget capable of writing on all types of surfaces. By using the Wonder Pen, you are not only helping yourself, but also this planet.”

The Wonder Pen is available at all online and in store at all Target and Costco stores nationwide. The pen has a starting price at \$39.99 but ranges to \$59.99 for the Wonder Pen Pro which includes bluetooth features.

About WriteWell Instruments, Inc.

WWI is the world’s premiere designer and manufacturer of a wide variety of personal writing instruments for the home and office. Founded in 1776, WriteWell’s first feather quill fountain pen was used by our nation’s fathers at the signing of the Declaration of Independence. The company’s 2021 sales totaled \$5 billion.
